

## ENCODER-RECEIVER-TRANSMITTER OPT OUT FORM Greater Vernon Water

The Encoder-Receiver-Transmitter (ERT) opt out option is available for Greater Vernon Water (GVW) customers. This option allows customers to request a manual reading of their meter(s) and not have an ERT installed on their property. Those who opt out will be subject to a quarterly fee per the current *Greater Vernon Water Rates Imposition Bylaw*, to have their meter read manually. The current fee can be found on the Regional District of North Okanagan website at [www.rdno.ca](http://www.rdno.ca).

I, _____, wish to opt out of the Automatic Meter Reading program and do not want an Encoder-Receiver-Transmitter (ERT) device installed on my property. I understand there will be a quarterly fee applied to my utility bill to have my meter read manually.
