Required information for Steel Structure Building Permit applications

In order to receive a building permit for a steel structure it is the responsibility of the owner or builder to ensure that the following documents are submitted:

- from the Structural Engineer, who is responsible for the structure; Certification of Manufacturers of Steel Building Systems, Schedules B, P and a copy of their certificate of insurance complete with two (2) sets of engineered sealed drawings (at a scale of $\frac{1}{4}'' = 1'-0''$);
- and from the Structural Engineer, who is responsible for the field review and foundation; Schedules B, P and a copy of their certificate of insurance complete with two (2) sets of engineered sealed drawings (at a scale of $\frac{1}{4}'' = 1'-0''$).

These requirements are in addition to the standard building permit application submission requirements.
