For Immediate Release
April 15, 2011

Required Information for Techno Metal Posts Building Permit Applications

This is a relatively new product being used in the Regional District of North Okanagan and the British Columbia Building Code makes no reference to this product. To ensure that they are installed correctly and that the product meets all structural minimum requirements engineering certification is required.

In order to receive a building permit for a structure or building that incorporates the use of Techno Metal Posts, it is the responsibility of the plan reviewer to ensure that the following documents are received:

- from the Structural Engineer, who is responsible for the product; Schedules B, P and a copy of their certificate of insurance complete with two (2) sets of engineered sealed drawings (at a scale of $\frac{1}{4}'' = 1'-0''$);
- and from the Structural Engineer, who is responsible for the field review; Schedules B, P and a copy of their certificate of insurance.

These requirements are in addition to the standard building permit application submission requirements.

These requirements are in addition to the standard building permit application submission requirements.
