	Residential Water Use Restrictions	DESCRIPTION: Represents normal (i.e. average) conditions for local area. Water use restrictions focus on water use efficiencies and drought awareness.	DESCRIPTION: Represents below normal conditions for local area. Water use restrictions focus on water use efficiencies intended to reduce water use by roughly 10%. If triggered by drought, represents early drought (drier than average) conditions for local area.	DESCRIPTION: Represents low water supply conditions for local area. Water use restrictions are necessary to sufficiently reduce water demand. Intended to reduce water use by roughly 20%. If triggered by drought, represents moderate drought conditions.	DESCRIPTION: Represents very low water supply conditions. Water use restrictions are necessary to maintain supplies during a period of critical water shortage. Intended to reduce water use by roughly 50%. If triggered by drought, represents severe drought conditions for local area.	DESCRIPTION: Strict water use restrictions are necessary to maintain critical supply. Intended to reduce water use by 90%. Represents an emergency loss of supply during which water is spared for consumptive and sanitary purposes only.
